Vagabond EP

Omissis, a Swiss band formed during the COVID-19 pandemic, has announced their new EP, "Vagabond," a three-track release showcasing their dynamic blend of styles ranging from NuMetal and Metalcore to Prog and Alternative influences.

Empty Bottles

The EP opens with "Empty Bottles," a hard-hitting and uncompromising track that seamlessly merges contemporary sounds with old-school thrash and metalcore elements. It's a punchy and energetic introduction to the band's diverse capabilities.

Fortitude

"Fortitude" follows, starting with a tension-building intro that leads into a massive mid-tempo section. This track highlights the band's ability to mix technical complexity with catchy and impactful arrangements. The progressive twist, characterised by numerous tempo changes and intricate sections, makes it one of the most impressive songs on the EP.

Vagabond

The title track, "Vagabond," features a memorable bass intro that transitions into an explosive section and a hardcore-inspired verse. The song ends with a melodic outro featuring stunning chants, contrasting the band's raw and intense sound. This track perfectly captures the band's ability to blend melody with hardcore aggression.

"Vagabond" is a testament to Omissis's versatility and creativity, showcasing their ability to blur the lines between various musical influences while maintaining a cohesive and powerful sound. The EP's production quality is top-notch, emphasising the band's modern twist on classic genres.

This release is particularly special due to the personal connections and challenges the band faced during its creation. With a diverse lineup and a vocalist originally from the UK, the band members bring a wide range of influences and experiences to their music.

Conclusion:

"Vagabond" by Omissis is highly recommended for fans of System Of A Down, Bring Me The Horizon, Linkin Park, and Malevolence. The EP captures the band's chemistry and intensity, delivering a raw and organic listening experience. Stay tuned for its release on major digital music streaming platforms and connect with the band on Instagram for more updates.
